

Badgers

- Badgers are **nocturnal** which means they usually only come out at night
- Their favourite food is **worms** but they will eat fruits and nuts, bee grubs and even hedgehogs if they can catch them
- They live in underground burrows called **setts**
- All the animals living in one sett poo all together in the same place to mark their territory
- The phrase “bald as a badger’s backside” came from the time when badgers used to be caught and their bums shaved to make shaving brushes for men.

Green Pathways supports young people with extra difficulties in their lives to improve green spaces for wildlife and people, and learn about and enjoy the environment. The project works in Peterborough, Fenland and Northamptonshire.
